Senior Software Engineer specializing in Developer Productivity, CI/CD infrastructure, and the JVM ecosystem. Experienced in scaling high-performance build systems, managing large-scale migrations, and contributing to open-source software.

Experience

Netflix

Senior Software Engineer 2018-04 - Present

- Architected and maintained large-scale CI tooling infrastructure, focusing on developer productivity and build performance.
- Led the implementation of CI autoscaling solutions to optimize resource utilization and reduce build latency.
- Partnered with cross-functional teams to modernize CI/CD experiences and manage complex, organization-wide migrations.
- Managed critical infrastructure for Artifact Storage and Version Control, ensuring high availability and reliability.

Transcend Insights

Senior Engineer 2011-07 - 2018-03

- Architected their Health Information Exchange product, enabling seamless data integration across healthcare providers.
- Built and managed a robust CI/CD system based on Jenkins and Kubernetes, streamlining the delivery lifecycle.
- Facilitated technical partnerships to build interoperable software solutions within the healthcare ecosystem.

Certify Data Systems

Employee of Intelliswift Software Inc — Java Developer 2008-04 - 2011-07

- Developed application-layer switching for Healthcare data.
- Built Build/CI/CD infrastructure and on-device updates & monitoring capabilities.

PRI Network

Employee of Intelliswift Software Inc — Java Developer 2008-02 - 2008-04

- Built customer-facing audit reports.
- Developed data migration tooling for complex relational dependencies.

Infosys Technologies Ltd

Software Engineer 2005-11 - 2008-01

- Developed compliance reporting systems and tools for complex data merging on Mainframe systems.
- Created tooling to migrate COBOL code to Java.
